## 

Landscape and territory evoke the same idea: the space where man lives out his time, a reflection of memory and history.

Satellites show an Earth full of unmistakable signs; signs of transformation and often of the damage that man leaves behind as he passes through. Streets, suburbs, steel, cement. Nature and landscape scored by the traces of life. Nature and culture, city and countryside, agriculture and industry, alternate and overlap, obstruct and merge into each other. Landscape as a fresco of diverse layers: historical and cultural; geographical and economic; religious and political; architectural and urban. Landscape to look at, enjoy and tend. Landscape to protect against the idea after development that consumes everything. Landscape to save for a sustainable development.

Sustainable recovery of urban areas is one of the tools for smart city development.

Telespazio, a Finmeccanica / Thales company, is a leading worldwide operator in satellite services. For more than 50 years Telespazio has been serving an ever-changing world: from the design and development of space systems to the management of launch services and in-orbit satellite control; from Earth observation services, integrated communication, satellite navigation to scientific programmes. We are constantly looking out to space in search of innovative solutions for a better life on Earth.

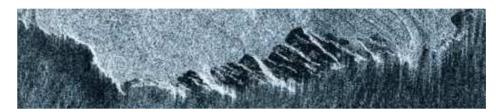

Telespazio, with its headquarters in Italy, is also present in France, Germany, UK, Spain, in East Europe and in South America and has space centres and operational sites around the world.

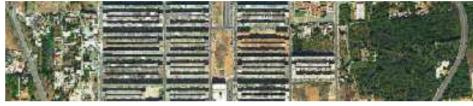

The 2013 calendar has been prepared in collaboration with e-GEOS, the company owned by Telespazio (80%) and the Italian Space Agency (20%), dedicated to Earth observation activities.
